

# Radiflow: Cyber Security & OT Risk Management for the Oil & Gas Industry

## A Structured Approach to Optimized OT Security

**SEE | Network Modeling and Visibility**  
Creation of an accurate digital image for ONG network visualization & breach & attack simulation

**KNOW | Risk Assessment**  
Risk KPIs and security reports are produced using network-specific and threat intelligence data

**ACT | Implementing a Prioritized Plan**  
An ROI-optimized OT security plan is drafted, based on security preferences & budgetary constraints

**MONITOR | Ongoing Threat/Risk Management**  
Efficient continuous threat & risk monitoring from multiple sites at MSSP or ONG Corporate SOC

## Trusted Worldwide

Over 6000 sites protected worldwide.

## Compliance

Radiflow's solutions are compliant ISA/IEC 62443 and other governing standards.

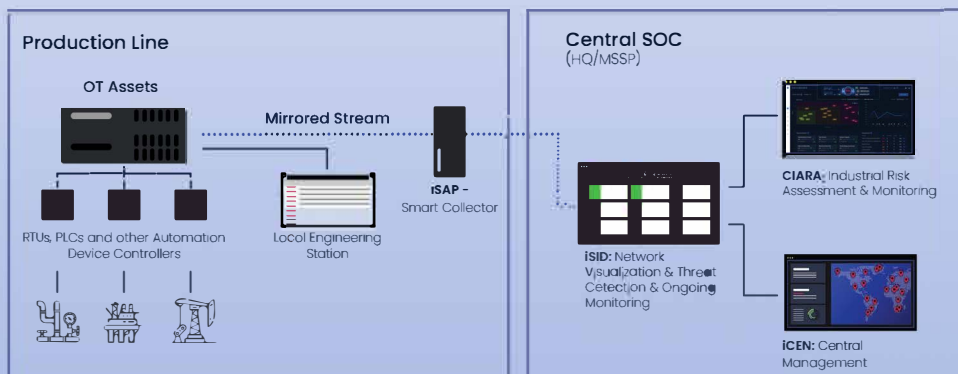

## About Radiflow

Radiflow is an OT Cyber Security company that develops unique tools to secure digital assets for the long term. The company works directly with Managed Security Service Providers to oversee the discovery and management of all relevant data security points. Founded in 2009, Radiflow has offices and partners in Europe, USA and APAC. Its' field-proven solutions are installed in over 6000 sites around the globe.

## About MMX

MMX Communications Services is a specialist end to end telecom and networking systems integrator. Our portfolio includes technical services such as staging, pre-build, multi-vendor telecom repair, specialist telecom network design and build, all complemented with a full warehousing and logistics capability. In addition to this, through our parent organisation, TXO, we offer a full recovery, refurbishment and resale service for customers who wish to extend the life of their legacy telecom networks.
